

Smart Choices IRL

The Morgan Nick Foundation would like to invite you to participate in NetSmartz, our safety prevention, smart choices IRL (In Real Life) program, for the upcoming 2008-2009 school year.

NetSmartz is an interactive, educational safety resource from the National Center for Missing and Exploited Children and Boys & Girls Clubs of America that uses interactive presentations to teach youth how to be safer when using the internet. The goal of the workshop is to extend the safety awareness of youth and empower them to make responsible decisions online and in real life. This is accomplished by teaching:

- Runaway Prevention
- Cyberbullying
- Revealing personal information online
- Dealing with harassment

The staff from the Morgan Nick Foundation is available to come out to your school at no charge, and present this up to date, vital, comprehensive safety prevention education. Please contact us to take advantage of this free program. Our calendar is filling up fast, so reserve your date as soon as possible.

With Hope,

Rhonda Adams
Director of Education and Outreach
